Farm Management

Synopsis

This text is developed for the first course in Farm Management, typically taken by a junior/senior level student. Designed to introduce students to the key concepts on how to effectively manage a farm business, the seventh edition provides students with the basic information needed to measure management performance, financial progress, and the financial condition of the farm business.

Customer Reviews

I bought this book specifically for my farm business class because I knew I would put it to good use. The book is full of useful information valid to farming and economic decision making on the farm. I will definitely be keeping this book for future reference after I graduate.

Buy this version over the more expensive versions because the content in all versions is the same. The book is poorly written and covers basic stuff in a farm setting. Too bad it was required for my class.

This book is the best farm management book I've read by far. It's accessible but it also goes into a fair amount of details about how to implement practical systems to manage your farm. Overall a great book. Perhaps the only thing missing would be a chapter on modern farm management software, which is of great help these days, like [...] or more recently [...]

I wanted to learn more about modern farming. This book shows the successful farmer is quite a

business man, and it teaches the business tools that one needs to keep a eye on a risky activity with a high investment costs.

Although I prefer to hire someone else to handle this work, this book was very informative and did a great job of explaining the processes for producing the best records for your farm business.

This was the exact book that I needed for school. It had enough pictures and details that I knew what I was purchasing. I also received the book fairly quickly too.

I really didn't get to use this book much but it was of good quality. As with any text book they are cheaper here than at the college.

Helps with my college course. Very informal and will give you ideas on how to have certain things or to do certain things if need be.
