Customer Reviews

I want to start off by saying that I'm an editor who has a friend in PR, and I have works independently published, so I had low expectations for this book. But there were so many reviewers saying that their books are bestsellers because of this book. I thought I would try it out. **WHAT I LIKE** The information on mind mapping and how to organize an outline from that. It was fairly practical information. I use mind maps, and I thought that the "system" translated to a good method of organization. The other information was easy to understand, and there were fairly useful resources provided. I didn't see canva mentioned, but maybe I missed something. That's a major one for book design. I liked some of the information in the Kindle Book Launch Blueprint chapter. I thought it was pretty intelligent to raise your price while doing a free promo so that readers have the perception of getting a higher value. I didn't even know you can manually stop your promos, so that was good to know, too. **WHAT I DIDN'T LIKE** Lack of practical application information in marketing itself. I have a friend who's in PR; I *know* you need to build an e-mail list of potential buyers. What I don't know is how to go about doing that. He said to tell everybody about your book prior to the free launch--who, exactly? And how? No real practical information. There are TONS of sites where you can get your ebook listed free; why not link to some of those sites or give reasons why it's not a good idea to use them? Your launch isn't going to do anything if nobody knows about it. The only thing I saw is to hold a cover design "competition" where you upload different versions of a cover on social media and ask for votes. *Everybody* does that.
