Pre-Algebra, Grades 4 - 5 (Skill Builders)

Synopsis

Skill Builders are great tools for keeping children current during the school year or preparing them for the next grade level. A variety of fun and challenging activities provides students with practice and helps introduce basic skills to new learners. This full-color workbook contains appropriate passages and exercises based on national standards for fourth and fifth grades to help ensure that children master pre-algebra math skills before progressing. Skill Builders combines entertaining and interactive activities with eye-catching graphics to make learning and reviewing fun and effective. The compact 6" x 9" size makes this book perfect for school, at home, or on the go. It features 80 perforated, reproducible pages and an answer key.

Customer Reviews

I did not realize how bad schools/teachers are until 6th grade when, at Math League meets, none of the problems matched what was learned in school. This book pointed out that pre-algebra concepts have been skipped since 4th grade. Apparently our teachers are more comfortable with arts and crafts than with teaching math. This book was great in catching up with what is expected in 6th grade. It is mostly pre-algebra/algebra, but it also has a bit of geometry. Each page has a brief example, it works better if a parent is available to give a more extensive explanation, or additional examples.

Great book for supplementary work! However book does not have good explanations (example on pg. 60).

I like these inexpensive little consumable books. They have enough practice problems and examples without being intimidating to my special ed students.

Love this book. Teaches and gives wonderful examples. Great at refreshing and driving the concept home. A+ in my book

Nice workbook would be better if it had better examples in it.
